

MUHAMMAD HUSNAIN

Full Stack Engineer | React.js · Next.js · Node.js · Express.js · MongoDB · AWS
0341-1222261 · husnainbhinder682@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Lahore, Pakistan

PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with hands-on industry experience designing, building, and deploying end-to-end web applications. Proficient across the complete stack — React.js, Next.js, Node.js, Express.js, MongoDB — with cloud deployment experience on AWS (EC2, S3, CloudFront, Elastic Beanstalk). Delivered measurable performance improvements, REST API integrations, and reusable component systems in Agile team environments. Passionate about scalable architecture, clean code, and continuous delivery.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Shadcn UI, Responsive Design, WCAG Accessibility
Backend: Node.js, Express.js, REST API Design, JWT Authentication, Zod Validation, Socket.io, Middleware Architecture, MVC Pattern
Databases: MongoDB, MongoDB Atlas, Mongoose ODM, MySQL, Database Schema Design, Query Optimisation, Indexing
AWS & Cloud: EC2, S3, CloudFront, Lambda, API Gateway, Elastic Beanstalk, IAM, RDS, Route 53, CloudWatch, Nginx Reverse Proxy
DevOps & Tools: Git, GitHub, GitHub Actions, CI/CD Pipelines, Docker (basic), PM2, Postman, Agile/Scrum, Code Reviews
Integrations: Stripe Payments, Google Maps API, RESTful APIs, JWT Auth Flows, CORS, Rate Limiting, dotenv Configuration

WORK EXPERIENCE

Full Stack Developer | BugMonks

Sep 2025 – date | Lahore, PK

- Engineered and deployed full-stack features using React.js + Node.js + MongoDB; built a reusable TypeScript component library adopted across 3 production modules, reducing feature delivery time by 20% and eliminating ~30% redundant UI code.
- Designed and integrated RESTful APIs with Express.js, enforced request validation via Zod schema middleware, and secured endpoints with JWT authentication — reducing auth-related bugs to zero.
- Participated in daily Agile standups, sprint planning, and peer code reviews; maintained 100% on-time sprint delivery across all development cycles.

Junior Full Stack Developer | Adam Technologies

May 2024 – Sep 2024 | Lahore, PK

- Shipped 5+ production web applications end-to-end: built responsive React.js frontends and Node.js/Express.js backends with MongoDB; improved Lighthouse scores by 18% via code-splitting, lazy-loading, and asset optimisation.
- Developed and maintained RESTful APIs and integrated third-party services (payment gateways, mapping APIs); boosted user engagement by 15% through accessible UI patterns and seamless backend integration.

PROJECTS

RIDEORA — Real-Time Ride-Hailing App (Full Stack MERN) | [GitHub ↗](#)

- Full stack: React.js frontend with real-time Socket.io map tracking, Node.js/Express.js backend, MongoDB Atlas database, Stripe payment integration, JWT auth, and Google Maps API — deployed on AWS S3 + CloudFront + EC2 with Nginx.
- Optimised state management and component memoisation (22% faster load); Stripe + JWT auth flows improved transaction reliability by 12%.

JOB FINDER — Full Stack MERN Job Portal | [GitHub ↗](#)

- End-to-end MERN application: React.js role-based UI, Express.js REST API with JWT RBAC, MongoDB with optimised queries (15% throughput gain), CORS + rate-limiting middleware, deployable on AWS Elastic Beanstalk + RDS.

SOCIETRIX — Society & Event Management Platform (Full Stack) | [GitHub ↗](#)

- Full stack MERN platform with multi-role dashboards, RESTful backend, MongoDB Atlas, and structured Git workflow (feature branches, PRs, protected main); reduced admin overhead by 15% and approval cycle time by 2x.

EDUCATION

BS Software Engineering — COMSATS University Islamabad, Lahore Campus

CGPA: 3.13 / 4.0

Relevant Coursework: Web Technologies · Database Systems · Operating Systems · Computer Networks · OOP · Data Structures & Algorithms · Software Engineering · AI · Software Design & Architecture
